The Steward Leaders Game™

Makes Learning Fiscal Management Fun!

Playing the Steward Leaders Game™ can help your congregational leaders learn ways to work together more effectively as they develop and set goals and manage finances.

Over three hours, with the guidance of a trained facilitator, game players simulate an entire year of managing your congregation's finances. The emphasis is on sustainability, fulfillment of mission, and building good will and community.

The Steward Leaders Game™ is modeled after similar games used in a variety of industrial and service professions. It has been widely tested and has proven its ability to grow people's fiscal management skills.

Facilitators are available for a single Steward Leaders Game™ event or to train people to guide networks of congregations in using the game.
